PROFESSIONAL SUMMARY

Senior Staff Software Engineer with 14+ years building distributed, high-scale Java/Spring/Microservices systems. Currently leading Cart & Checkout engineering at Albertsons, serving millions of transactions across 2,300+ stores. Deep expertise in cloud-native architecture on AWS and GCP: Kubernetes, Kafka, Spring WebFlux, and RESTful microservices. 5+ years in Supply Chain/OMS (Manhattan EOM/DOM) and 5 years in payment systems (CyberSource, PayPal). Proven engineering leader with a track record of reducing latency, improving observability, and delivering AI-driven developer tooling that saves hours of manual effort weekly.

TECHNICAL SKILLS

Languages	Java 8/11/17, JavaScript, SQL, Scala, Node.js
Frameworks	Spring Boot, Spring WebFlux, Spring Cloud, Hibernate, Struts2
Cloud & Infra	AWS (EKS, Lambda, S3, SQS, CloudWatch, IAM), GCP, Kubernetes, Docker, Terraform
Messaging	Apache Kafka, SOAP/REST Web Services, Amadeus GDS
Databases	Oracle 12c, Cassandra, MongoDB, MySQL, Redis, SOLR/Lucene
Observability	Dynatrace, Splunk (admin + ML), Distributed Tracing, JMeter
CI/CD & Tools	Git, Jenkins, Bamboo, Maven, IntelliJ IDEA, JProfiler
Methodology	Agile, Scrum, SAFe, Kanban, Sprint Planning, Retrospectives, Cross-functional Team Leadership
AI/Agentic	MCP Tooling, Agentic Workflow Development, LLM Integration
Domains	E-commerce (Cart/Checkout), Supply Chain (OMS/DOM), Payments (CyberSource, PayPal), Travel (GDS)

PROFESSIONAL EXPERIENCE

Albertsons Companies (Safeway) | Plano, TX

Oct 2022 – Present

Senior Staff Software Engineer — Cart & Checkout

- Led architecture and delivery of Cart & Checkout microservices on AWS/Kubernetes supporting millions of daily transactions across 2,300+ stores; reduced checkout latency by 20% via Spring WebFlux reactive refactoring.
- Established architecture and design standards across a cross-functional Agile team; drove distributed tracing and structured logging via Kafka pipelines, significantly reducing MTTR.
- Built MCP-based AI agents to automate routine DevOps tasks (branch cuts, merges, Veracode vulnerability remediation), saving 5–6 engineering hours per service per week.
- Proactively identified and resolved systemic checkout failure patterns through root-cause analysis, preventing recurring customer-impacting incidents.
- Authored system architecture documents, operational runbooks, and deployment playbooks adopted org-wide; reduced onboarding time for new engineers.
- Translated complex business and regulatory requirements into scalable technical designs; collaborated directly with product, legal, and operations stakeholders.

Tech Stack: Java 17, Spring WebFlux, Kafka, Kubernetes, AWS (EKS, Lambda), Docker, Cassandra, Dynatrace, Splunk, Git

Onriva.com | Dallas, TX

Feb 2022 – Oct 2022

Software Architect — Flight Analytics

- Designed JEE-based application architecture for AI-driven travel platform; built RESTful microservices integrating Amadeus flight/hotel availability APIs.
- Delivered full-stack features using Java, Node.js, HTML/CSS/JavaScript; implemented Spring DI/AOP and JAXB-based SOAP service integrations.
- Managed release pipeline via Git; deployed to Apache Tomcat and JBoss application servers.

Tech Stack: Java 11, Spring, Hibernate, Node.js, REST/SOAP, AWS (EKS, Lambda), Kubernetes, Docker, MongoDB, Git

enVista LLC | Dallas, TX

May 2021 – Feb 2022

Development Manager — enspire Commerce (OMS/DOM/EOM)

- Led technical analysis, estimation, and delivery of supply chain OMS features in an Agile/Scrum SaaS environment; participated in sprint planning, backlog grooming, and retrospectives.
- Facilitated architecture meetings and Scrum ceremonies; communicated progress, risks, and action items to stakeholders across engineering and product.
- Drove production incident resolution while managing competing sprint priorities across multiple teams without compromising quality or timeline.

Tech Stack: Java 8, Spring, Hibernate, REST, Oracle 12c, MySQL, AWS, MongoDB, Microservices

Priceline.com | Norwalk, CT

Apr 2018 – May 2021

Senior Java Developer — Common Platform Services / Flights

- Designed microservices architecture for Flights Tools team to onboard new GDS providers and aggregators; built a multi-threaded Executor-based integration layer interfacing with 30+ external APIs across Hotels, Flights, and Cars to close pricing discrepancies and unify fare availability in real time.
- Architected and administered Splunk deployments; developed ML scripts for anomaly detection, reducing critical application crashes by proactively alerting on failure patterns.
- Integrated Kafka, databases, and application logs into Splunk via Java-based data pipelines; built Bamboo CI/CD pipelines using Maven.
- Led engineering on multiple mission-critical projects with direct revenue impact across Priceline's core platform.

Tech Stack: Java 8, Spring, Hibernate, Kafka, Splunk, GCP, Microservices, Oracle, MySQL, Bamboo, Git

Manhattan Associates | Atlanta, GA

Jun 2015 – Mar 2018

Senior Java Developer — Enterprise Order Management (EOM/DOM)

- Built custom payment API integrations (CyberSource, PayPal, Gift Cards) within Manhattan's DOM through integration frameworks; engaged directly with clients to gather requirements, triage production issues, and deliver custom module enhancements.
- Drove 10–20% performance improvements per client engagement through targeted DB index optimizations, code-level refactoring, and JVM tuning (GC strategy, heap sizing, PermGen/Metaspace configuration) validated via JMeter load tests, thread dumps, and GC analysis.
- Installed and deployed MA products (DOM, WMS) in client production and test environments; maintained Oracle 12c database schema.

Tech Stack: Java, Spring, Hibernate, SOLR, Oracle 12c, JBoss, JMeter, Dynatrace, GCP, Redis, Linux

Comcast (via Mycon Information Systems) | West Chester, PA

Oct 2014 – Jun 2015

Senior Java Developer / Project Lead — ESP Services

- Designed standalone application architecture for Comcast's billing and payment integration services; built Spring/Hibernate application with CyberSource payment gateway, coordinated offshore teams, and managed deployments to WebLogic with Hudson CI.

Tech Stack: Java, Spring, Hibernate, Oracle, REST/SOAP, WebLogic, Maven, CyberSource

FedEx (via Syntel) | Collierville, TN

Nov 2013 – Oct 2014

Senior Java Developer — FedEx ePRS

- Designed JEE-based pricing maintenance system (Spring, Hibernate, IceFaces) with DAO/Service layers, HQL queries, and Factory/Singleton patterns; managed WebLogic deployments via Maven and Hudson CI.

Tech Stack: Java, Spring, Hibernate, IceFaces, Oracle, WebLogic, Maven, REST/SOAP

Griffin Travels (via Syntel) | Chennai, India

Nov 2011 – Nov 2013

Java Developer — Homeport

- Built Struts2/JSP travel management system for Air, Car, Hotel, and Chopper booking workflows with Amadeus SOAP/JAXB integration; delivered invoicing, QC, and booking dashboard modules using Spring, Hibernate, and Oracle on JBoss.

Tech Stack: Java 1.6, Struts2, Spring, Hibernate, JAXB, Oracle, JBoss, ANT, SOAP

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Amazon Web Services

Oracle Certified Professional, Java SE Developer

Oracle

DataStax Apache Cassandra Developer Certification

DataStax

EDUCATION

Bachelor of Technology, Information Technology

2011

Jawaharlal Nehru Technological University (JNTU), Kakinada, India
